

CONSOLE STYLING 101

Between a Pair of Lamps

OPTION 1

Stack of Books + 2 Decorative Objects

Step 1. Create a stack of three books. Pick books that represent your family or that fit the color scheme of the room. Remove dust jackets from hard cover books.

Step 2. Display two more interesting objects like the metal sphere and candle here.

Extra Touch: Put a small decorative object on top of the stack of books.

PRO TIP

Keep visual clutter at bay by sticking to **one** or **three footprints** on a console table (excluding the lamps). A stack of books with an object on top counts as a single footprint. If you have many small items to display, see Option 2. A decorative tray counts as only one footprint.

OPTION 2

Decorative Tray

Keep many smaller decorative items neat by arranging them on a tray.

OPTION 3

Minimal Look

Display one single object, like a decorative bowl or sculpture, or a trio of matching objects, like candle holders or bud vases.
